

# The Little Engine That Could Craft

1. Cut your colored paper in half so that it measures 8x5.

2. Draw the basic shape of a train using your pen.

3. Cut out different shapes from the other pieces of card stock/paper.

4. Add a roof, chimney, bumper... whatever you like.

5. Cut your toilet paper roll in half. Then make one cut in each half, roughly 1.5 cm in length in the middle of the roll.

6. You can now slot the train into the toilet paper roll wheels.

7. How long a train can you make?
