

# Toddler Train Craft

1. Cut several rectangles out of colored cardstock.
2. Cut an engine out for each child (older kids can cut their own) out of blue cardstock (just like in *The Little Engine That Could*).
3. Draw a train track on each white piece of cardstock.
4. Let the kids choose their favorite colored rectangles and a blue engine and glue their train pieces onto the railroad track.
5. Added the sticker foam wheels.
6. Draw steam coming out of the engines using crayons and markers.
